

Reference Information on Hardware for Running FT, CMStudio or CM32

Information / advice on hardware is provided by us at no charge on a "for reference" basis only and that we cannot be held liable under any circumstances for use or non-use of such information. Please also note that the hardware scene changes very quickly, so this information can become outdated quickly.

Processor: CPU type is now fairly important due to the manner CPU's now handle graphics and multimedia. The processor should be better than Intel i5 750 or AMD Phenom II X4 945.

| | | |
|----------------|--|------------------|
| Memory: | For Storyboard Artwork at 300 dpi A4: | 3000 MB (4 GB) |
| | For Prints / Storyboard at 300 dpi A3: | 4000 MB (5.0 GB) |
| | For Prints / Storyboard at 500 dpi A3: | 5000 MB (6.0 GB) |
| | For Prints at 300 dpi 1mt ² : | >6.0 GB |
| | For 3D Knits: | 4000 MB (6.0 GB) |

Please allow more memory if other Windows applications are to be open concurrently.

Note: These Ram requirements are optimized to Windows Vista Business/ Windows 7 Pro.

Hard disk: 500 GB or larger.

Graphics Card:

Recommended: Most 1gb graphics cards are approved for use with FT, Studio, Modaphix or CM32.

Thumb Drive/USB Drive: We recommend USB Thumb Drives for quick and easy file transport on Windows Workstations.

DVD ReWriter: Installation of a DVD-RW is highly recommended, to enable easy volume backup and data transportation.

Scanner: Try to get a scanner with a "De-Screening" function, so that images from magazines and some types of prints can be de-screened.

Recommended:

A4: Canon LIDE700F

A3: Epson 10000XL

Printer:

Recommended:

Canon ip4700 (A4

Canon iX5000 (A3+);

Avoid:

All 6, 7 and 8 Colour inkjets (inks take 24hrs to dry)

Operating System:

Recommended:

1. Windows 7 Pro

2. Windows Vista Business
